The Mixed Methods Interdisciplinary Graduate Group

MISSION
The mission of the Mixed Methods Interdisciplinary Graduate Group (MMIGG) is to serve as a resource and community for University of Minnesota faculty, students, and staff who are interested in integrating qualitative and quantitative sources of information in their scholarly work.

Activities of the MMIGG include:
• Informal, monthly meetings of members to discuss critical topics and research in mixed methods during the academic year (free pizza provided).
• Seminars and webinars on key topics related to mixed methods research conducted by internationally-renowned scholars.
• A yearly faculty retreat to discuss collaborative opportunities related to mixed methods research.
• A doctoral seminar (NURS 8107: Mixed Methods in the Behavioral, Social and Applied Health Sciences) offered each spring semester that provides students with the opportunity to apply mixed methods design strategies to their own research projects.

Services provided by the MMIGG include:
• A virtual library of MMIGG meeting correspondence, presentations, and other mixed methods resources (http://tinyurl.com/MMIGGlibrary).
• A mixed methods grant proposal (http://tinyurl.com/MMIGGgrant) and manuscript peer review service (http://tinyurl.com/MMIGGmanuscript) for University of Minnesota faculty, students, and staff, including group mock review.
• The opportunity for University of Minnesota faculty, students, or staff to request a speaker of prominence to conduct a seminar or webinar on mixed methods topics (http://tinyurl.com/MMIGGspeaker).
• MMIGG-led seminars that provide overviews of mixed methods research for faculty, students, or staff in various academic units throughout the University of Minnesota.

Support of the Mixed Methods Interdisciplinary Graduate Group is provided by the University of Minnesota Office of Interdisciplinary Initiatives, School of Nursing, College of Liberal Arts, and the Department of Educational Psychology.
